INTRODUCTION

Hello there! I am Thao, 26 years old. I did a non-programming job for personal reasons. Now I want to go back to being a developer. Programming is my favorite profession. In short, I will study more, work more to become a Full Stack Javascript Developer. And in the future I want to become a Senior Full Stack Javascript Developer. I know it's hard but I believe I can do it.

WORK EXPERIENCE

Not yet working at a company in the software development industry

I know your company needs experienced people. I have never worked in this software development industry before. So I had to create my own experience. I want you to check out the experiences I've created for myself at https://thao15059.github.io/portfolio/. Go to the Projects section and click on each image and check it out. I will still create for the experience myself for each day. I just need your company to give me a chance.

EDUCATION

Self Study | (2020 - Present)

- Learn coding from online learning platform like Udemy, Pluralsight and one of my favorite free online platforms is Youtube.
- I love learning. It makes me better every day. When I learn a new technology I will apply it to my future projects. You can check out my completed projects at the following address github.com/thao15059
